

Pullman Website Integration Guide

Rooms & Meetings Pages

Value Drivers: *Room Bookings | Room Upsells | Group Bookings*

Product Tiers: *SalesHub Starter | SalesHub Pro*

Overview

Pullman hotels can elevate their brand websites by embedding immersive virtual tours directly within the Rooms and Meetings sections. With **SalesHub Starter** or **Pro**, properties can visually showcase their accommodations and event spaces in a way that static photos simply can't match—creating emotional connection, driving bookings, and accelerating group inquiries.

Benefits:

- **Inspire Wanderlust and Drive Bookings:** Immersive virtual tours give potential guests a vivid, emotional preview of your resort—showcasing scenic views, luxurious amenities, and unique experiences that photos alone can't capture. By letting them explore before they arrive, you spark excitement, build connection, and turn dreamers into bookers.
 - **Go Beyond the Capacity Chart:** Help planners understand flow, layout, and ambiance in a way specs alone can't convey.
 - **Deliver Virtual Site Tours, Instantly:** Give planners a quick, self-guided look at your meeting spaces—helping them assess fit and flow right from the listing.
 - **Inspire Confidence:** Virtual tours provide clarity and transparency, helping planners visualize their meeting space feel more confident in choosing your property over others.
 - **Accelerate Event Inquiries:** With fewer questions and more clarity upfront, planners are more likely to reach out and move forward, faster.
-

Step-by-Step: Creating Your Link List

Step 1: Select the Right Assets

- Choose one immersive asset per room & suite listed on your website
- Recommended Asset Types:
 - 360° Photos for Standard Rooms or Views, Ballrooms, Unique Events
 - Enhanced 3D Models for Suites, Connected Meeting Space

Step 2: Generate Share Links

To streamline deployment, download the attached [worksheet](#) and follow these steps:

- Open the specific asset modal in your asset library
- Click the drop down arrow next to **Channel Distribution**
- Click the **Copy** button next to **Link**

Step 3: Submit to Your E-Commerce Manager

Once your links are ready, follow this procedure:

- Email your **E-Commerce Manager** with the final list of virtual tour URLs
- Specify which room types or meeting spaces each link should be embedded into
- Ask that the virtual tour links be added as pop-up modals associated with individual rooms or space descriptions on your website

***Important Note:** For the best viewing experience, most websites only require a URL link to display content in a popup modal—this avoids redirecting users, opening new tabs, or embedding heavy elements that slow down page load. Popups are the preferred method, and if automatic conversion isn't supported, popup script code can be added manually.

Recommended Content Types

Content Type	Why It Works
Enhanced 3D Models	Let planners “walk through” the meeting space virtually
360° Photos	Offer a highly realistic, detailed view of spaces and setups
CGI Setups	Visualize event layouts without having to stage your room during the photoshoot

These formats help planners visualize your space, assess fit, and accelerate engagement.

Placement Best Practices

- Whenever possible, use a pop-up modal to keep the user on your website. This ensures a faster, smoother experience
 - Avoid opening new tabs or embedding the experience directly on the page, as these methods can slow down load times and disrupt the flow of engagement
 - Use consistent CTAs ("Take a Virtual Tour") to indicate interactivity
-

Make Sure Your Virtual Tours Work Seamlessly

To ensure your platform content loads quickly and works smoothly on your website, we recommend sharing a quick list of approved web domains with your IT team. This helps make sure your virtual tours, booking links, and interactive experiences display the way they're intended—without being blocked or slowed down by network filters.

One key domain to include is <https://visitme.co>, which powers many of your tour links.

You can find the full list of recommended domains to allow [here](#).

Need Help?

If you're unsure which assets to include, or how to generate your asset link, contact your Customer Success Manager.
