Recommended Content Types

Content Type	Why It Works
Enhanced 3D Models	Let planners "walk through" the space virtually
360° Photos	Offer a highly realistic, detailed view of spaces and setups
Aerial 360°	Offer context with immersive views of the full property and surrounding locale
Nearby Attraction Tours	Highlight local destinations that support leisure & group
Video Productions	Engage audiences with dynamic walkthroughs

These formats increase clarity, encourage upsells, and enhance guest confidence.

Placement Best Practices

- Whenever possible, use a pop-up modal to keep the user on your website. This ensures a faster, smoother experience
- Avoid opening new tabs or embedding the experience directly on the page, as these methods can slow down load times and disrupt the flow of engagement
- Use consistent CTAs ("Take a Virtual Tour") to indicate interactivity

Make Sure Your Virtual Tours Work Seamlessly

To ensure your platform content loads quickly and works smoothly on your website, we recommend sharing a quick list of approved web domains with your IT team. This helps make sure your virtual tours, booking links, and interactive experiences display the way they're intended—without being blocked or slowed down by network filters.

One key domain to include is <<u>https://visitme.co></u>, which powers many of your tour links.

You can find the full list of recommended domains to allow here.
